

FACULTY OF ECONOMICS

(Studentų str. 39a, Vilnius)

STUDY PROGRAMMES

Banking

This program prepares highly qualified professionals in business management, specializing in the financial sector. Graduates gain the ability to plan, organize, and control banking processes while managing financial products and services. They develop skills in financial analysis, risk assessment, and advising clients on credit, savings, and investment. The program also covers fintech innovations, electronic banking, and regulatory compliance. Additionally, graduates are trained to communicate effectively in multicultural environments and uphold ethical and socially responsible banking practices.

Business Economics

The Business Economics program prepares professionals to work as economists, analysts, and project managers in various business sectors, financial institutions, and public administration. Graduates develop skills in economic analysis, decision-making, and forecasting, using modern research methods and information technologies. They learn to evaluate economic and financial

processes, formulate data-driven conclusions, and propose solutions for business development. The program also emphasizes teamwork, communication in multiple languages, and ethical responsibility. Additionally, graduates gain the ability to establish and manage their own businesses while contributing to economic innovation and sustainability.

Investment and insurance

The program prepares professionals to analyze business information and provide expert advice on insurance and investment matters. Graduates learn to assess financial markets, manage sales of insurance and investment products, and tailor solutions based on clients' needs and financial capacity. The curriculum covers risk assessment, portfolio management, and the impact of global trends and technological advancements on financial services. Students gain knowledge of national and international financial regulations and develop skills in sustainable investment decision-making. The program also equips them with the ability to communicate effectively with clients and stakeholders while ensuring compliance with legal and ethical standards.

Finance

The Finance study program prepares professionals to manage and analyze financial processes in both the public and private sectors. Graduates acquire knowledge of financial management, accounting, and financial control methods, enabling them to assess financial health and make informed decisions. The program emphasizes the use of modern analytical and forecasting tools to ensure sustainable financial planning. Students learn to prepare financial reports, manage cash flows, and develop strategies for investment and risk management. Additionally, they gain the ability to navigate a multicultural and dynamic business environment while promoting sustainable financial practices.

Accounting

The Accounting study program prepares graduates for careers as accountants, bookkeepers, and auditor assistants in various organizations or their own accounting service businesses. Students

develop skills in financial reporting, data management, and the application of Lithuanian and international accounting regulations. The program emphasizes the use of modern accounting technologies, financial analysis, and internal control methods to ensure accuracy and reliability. Graduates are trained to critically assess economic environments, prepare financial and tax reports, and make informed decisions to maintain data integrity. Additionally, they learn to communicate professionally in Lithuanian and foreign languages while upholding ethical and social responsibility principles.
